Questions asked in jpmc interview

When i entered ,they asked me how am I...I said good

1.a)which ngo u worked for ?what was its problem statement?what was your contribution?

-->I worked for nasscom foundation.Explained the problem statement and and said i made the use case diagram and did the easier coding part since the two guys in group were coders they did most of the coding

1.b)Asked me to draw the use case diagram?

-->I drew it..i was speaking while drawing....dey seem convinced so stopped me in between.

2.a)in this sem which is your favourite subject ?

-->i said simulation

2.b)Asked me what is simulation and its benefits?

-->i explained it using metro example

3.design a simulator for a metro

-->sorry i didnt get you..what exactly i m supposed to do...sir i ll honestly tell u sir i m just done 15 days with the college...since u asked this sem fav sub i said simulation otherwise my fav sub is diff

Interviewer:no we meant overall which is your fav sub?

-->its ooad but would still like to finish this problem and then switch

Interviewer:ok

i asked interviewer again wat i m exactly supposed to do...he said give me ur thought process...after some tym i said we will check metro for diff whether conditions and then i gave the condition for rain to enter metro.

4.design a flying object

-->i asked him to give me properties of flying object

Interviewer:u give me

-->the questions i asked him

how high he want the object to fly

how long is the object

can ppl sit in the flying object?if yes how many

what is the speed of the object?

what is the arrival and departure places

(he seemed impressed)

5.your favourite language?why?

-->i said php

is php object oriented?

-->yes it is

(he admitted he didnt know php...so didnt ask much)

6.what awesome u did in javascript

-->i didnt do much...we used to use jquery for awesome GUI stuff(not a good answer)

7.if ur client irritates u for a trivial job , and u have lot of work to do...what will u do?

--> client comes first so i will handle him first...if its a trivial job i wont take my much tym

interviewer:consider its not a trivial job

-->i will still handle the client first...and ask my manager to give me two more days to complete the job.

8.what authentication u do at server side

9.why jpmc

10.what is inheritance and composition?and difference between them?

11.What are the benefits of inheritance

12.what is dynamic polymorphism

13.do u like ur java teacher?

what effort did u take to learn java on your own...more than your curriculum.

14.what do u know about html5
