

SECLORE (20 Oct '14)

Abhishek Maurya (EXTC 2015)

The whole procedure was for two days

First day Seclore visited our campus and second day the interview were taken at their office.

First Day: After PPT, the procedure started. They take a lot of rounds and they can put extra rounds on the spot so be prepared for it.

1st round - Aptitude Test

It was a pen paper test. Test consisted of 16 logic questions for 30 mins with 50% negative marking. Please attempt wisely as negative marking is high. The time is enough for thinking and attempting 16 questions. I attempted around 13-14 questions.

Around 18 were shortlisted from 65-70.

2nd round - Technical quiz - Pen paper test.

Java code on trees was given with some functions. 6 questions were given and we were asked to answer in one line only Questions were like what is this function doing, if you remove this node how the new tree will look like.

The test was tough. Try to attempt each and every questions as there are no negative markings, even if you are close to the answer they will consider.

I only attempted 3 out of 6 questions and I was pretty sure that I would not go through the round.

They announced the result of the round.5 of them were directly shortlisted for the interview.

While 5 were asked to give another written test (I was among them)

3rd Round - Puzzle Test

Two puzzles were given and it was asked to give solutions to the puzzle.

If you know the solution, try to explain it in detail.I knew both the answers and gave a detailed explanation for it.

2 were selected for the interviews.

4th round - Interviews

In all there were 7 candidates for the interviews.

The interviewer asked me puzzles; he was looking for my approach on every puzzle. He also asked few basic HR questions

For puzzles do read "[How to ace brain teasers interview](#)" and also keep on discussing puzzles with your friends; this will help you to get the different views and you can come with different and creative solutions for the puzzles.

Within few minutes the results were announced, 4 were selected for the final round which was kept at their office next week.

Final Round -

It was a pool campus. There were 12 candidates for the Final Round.

Interviewer asked me about some questions on the technical quiz of which was taken in the college.

Asked me about what have I studied in the previous semester. Asked me to explain a subject in brief like what have you covered in this subject. Few basic questions on that subject.

Then a puzzle question for which I took time, I couldn't solve that puzzle but they liked my approach towards solving that.

Questions were asked on my T.E. project and the applications of it in real life. Then few HR questions related to why you want to switch to Software Company being an EXTC Engineer.

Finally 6 got placed.

Seclore is very quick with their selection process. Be confident and All the best.
